SENSEI
Essence

ANCIENT KNOW-HOW FOR A TRADITIONAL EXPERIENCE • THE ROYAL TOUCH
Exclusive massage techniques • 6X roller technology

SENSEI
Essence

ITSU
御手の物®

Every experience comes from strong perseverance and spirit. We keep it simple, adhering strongly to one principle, which is “delivering an authentic Sensei experience with the help of modern technology”. With more than 20 years of experience in the reflexology industry, we are determined to learn and retain these traditional, age-old techniques and practices used by massage therapists.

ITSU uses technology to recreate these hand-massage techniques, so that they can be preserved throughout time, letting everyone enjoy them for years to come. This is our unwavering commitment to bringing excellence in traditional and precise massage technology.

In order to embody the true art of traditional massage, ITSU fuses together innovative, cutting-edge technology with massage techniques that feel as though they are performed by hand. The word “ITSU” is derived from the Japanese phrase “御手” (meaning “the royal touch”), reflecting our professional commitment in providing customers with the best products and services in this industry.

Full-body massage with 6-roller, 4D signature ITSU movements offering the royal touch

The solid, 6-roller, flexible mechanical arms work to provide a comprehensive massage, supplemented with an S-shaped design that kneading and rubbing motions, increasing the massage area by 300%.

On the ITSU Sensei Essence massage chair, the rollers go over the entire massage area, working to relieve and release pressure on the cervical spine and back lumbar area, effectively eliminating fatigue. At the same time, the adjustable built-in settings with 3 width options and 6 speed options offer extensive customisable choices to suit your personal preferences.

The 5x5 selection feature offers 25 different types of ITSU Sensei massage techniques, with a total of 32 automatic massage programs for total convenience and comfort. 10 levels of intensity settings, provide a fully-immersive, tailor-made massage experience that is 100% suited to your needs.

Appearance-wise, the well-designed chair is luxurious and exquisitely detailed. The interior of the chair comes with 6 kinds of air pressure, supplemented by massage rollers that operate in wave movements, offering an exceptionally comfortable massage. In addition, the foot massage bed is equipped with a "Gua Sha" scraping function, offering instant relief for fatigued soles to improve general well-being.

S-shaped mechanical arms increase the massage area by 300%

Daily healthcare massages can improve insomnia

Sleep pressure point

The sleep pressure point is located in the centre of the concave area behind the earlobe, in the depression below the occipital bone, between the Feng Chi pressure point and Yi Feng pressure point. Putting pressure on this acupressure point for 5-10 minutes daily can help calm your nerves and improve sleep quality, while also alleviating symptoms such as high blood pressure, headaches, dizziness, irritability, and heart palpitations.

Yong Quan pressure point

The Yong Quan acupressure point on the sole of the foot is the first kidney acupuncture point. It is located on the ball of the foot, slightly further down from the base between the second and third toes.

Meticulous care for your hands

Complement your health with acupressure massage

Each living organism has its own relatively independent life function, which is also referred to as "life force energy". The hands are a rich source of this "life force energy", which reflect the condition of various body parts. Through massage, various acupoints of the hands can be stimulated, which help to improve corresponding tissues and organs, playing a significant role in preventing and curing ailments while strengthening the body.

In Traditional Chinese Medicine, the hands are related to numerous acupuncture points, including three Yang meridians, three Yin meridians, and their acupoints' circulation and distribution. There are also fourteen separate channels, each distributing numerous special acupoints that can be used to treat systemic diseases, allowing a conducive flow of "Qi" within the body.

The 9 pressure points of the palm

The FIRST-EVER massage chair with Palm Massage Function

The ITSU Sensei Essence is the first in the industry to feature a palm massage function. Harnessing the power of pressured airbags, shiatsu movements stimulate corresponding acupuncture points on the hands and palms, promoting blood circulation to strengthen the body's inner strength. Simply slide your arms into the airbags, and let ITSU Sensei Essence do the work.

Pressured arm airbags

Palm scraping rollers

Warming compress

Innovative leg and foot "Gua Sha" Function

Our feet withstand the most stress on a daily basis, bearing the entire weight of our bodies while having to take us places. Like our palms, the soles of our feet are also connected to major acupuncture points of the human body, and therefore deserve the same amount of attention during massages.

ITSU Sensei Essence's unique leg and foot "Gua Sha" scraping function is guaranteed to offer you an enjoyable experience with complementary airbags and massage rollers. Varying pressure and movements help the feet to relax, relieving fatigue and detoxifying the body. Blood circulation is improved, fully relaxing the body to prepare you for a good night of deep sleep.

Foot & sole roller massage

Calf-kneading airbags

Sole point "Gua Sha"

Stay healthy & relaxed, always.

Offering an all-new, authentic-feeling massage technology comparable to human hands, featuring 5 major areas with 25 healthcare techniques and 32 massage programmes.

The ITSU Sensei Essence uses a combination of various massage techniques such as Shiatsu, kneading, rubbing, pushing, and knocking, expertly fine-tuning each technique to care for users with different degrees of muscle soreness. Designed with the user in mind, a total of 25 health techniques and 32 automatic massage programmes deliver instant relief to 5 major areas. The unique warming massage function effectively promotes blood circulation, offering a comprehensive soothing experience from the neck to the shoulders, back, and waist. Like the warm, comforting hands of a professional traditional masseur, each experience with the ITSU Sensei Essence brings you one step closer to good health.

Tapping

Kneading

Beating

Pushing

Rolling

Combination

Extra-long S and L-shaped track

Designed to snugly fit against the S-curve of the human back, with an added L-shaped track, the rollers complement each other, providing an even more precise way for massage rollers to massage every part of the body.

Space-saving design

Using an intelligent front slide technology, the back of the chair only requires 4cm of space away from the wall when retracted, saving a lot of space and making it easier to store.

Zero gravity massage

The unique zero gravity massage function can help you feel as though you are sleeping in a cradle. It helps your entire body relax, in order to efficiently relieve mental stress and release fatigue.

Intelligent body type detection

4 main custom programs, offering personalised massage patterns for everyone in the family.

The massage chair is equipped with an intelligent body type detection function, allowing it to perform precise massages according to various body types. You and your family will be able to enjoy a unique massage program specially tailored to suit your unique body type, plus a rejuvenating full-body air compression experience offered by the built-in wraparound airbags.

Personalise your massage chair to suit you

With ITSU, we not only offer a massage chair that tailors massages to suit your preferences and body type, but also customisable services. We have a range of colour choices available, allowing you to create a massage chair that is a perfect match for your personal style and décor. We recommend pairing your personalised massaged chair with our signature “Gua Sha” scraping function, which not only promotes blood circulation, but also completely relaxes the body and reinvigorates the spirit, bringing you high-quality sleep.
